

Towards a Creative Education in the Classroom Methodologies and Innovative Dynamics for Teaching

Welcome to "Towards a Creative Education in the Classroom, Methodologies and Innovative Dynamics for Teaching", a course addressed to all those people interested in updating their knowledge about all new trends in the field of pedagogical innovation and new teaching methodologies.

In this course, you are going to be immersed in a fully online learning environment which is used to create a personal experience of many of the issues addressed in the training programme.

New technologies are widely used in schools to support and enhance teaching and learning and often form the focus of curriculum change and educational reform processes.

Schools can provide opportunities for young people to learn about global development

This module aims to assist students to enhance their professional practice by developing their understandings of issues that impact on the effective use of new technologies in education and training.

Everyday there are new technology resources available to help teachers make their classrooms more innovative and connect their students to new ideas, challenges, and resources that will let them dig deeper into what they're learning in class.

Sorting through all of these resources could be a full-time job, so consider these technology resources to support and challenge students, and to build on your current curriculum

Would you like to introduce new teaching methods in your classroom?

Do you want to learn how to design more innovative materials for your classes?

In this course you will get the tools to develop your own innovative educational resources, learning new ways of teaching

Your classroom could be different

Your classroom should be student-centered, not teacher-centered.

Welcome to the classroom of the future
